

TABLE OF CONTENTS

Start Quick and Ramp It Up! 4th Grade Measurement

ACTIVITY TYPE	ACTIVITY	TOPICS	PAGE
	<u>Table of Standards</u>		4
Ramp Up	<u>Amazing Body</u>	Understanding Conversions	7
Ramp Up	<u>Another Way to Say</u>	Conversions	16
Ramp Up	<u>Space & Time</u>	Conversions	21
Ramp Up	<u>What Goes Together?</u>	Length Without Conversions	27
Launch	<u>Scavenger Hunt</u>	Distance Without Conversions	32
Ramp Up	<u>How Long, How Far?</u>	Length with Conversions	41
Ramp Up	<u>Mia's Tree House</u>	Perimeter & Area Without Conversions	50
Ramp Up	<u>All the Way Around</u>	Perimeter & Area Without Conversions	55
Ramp Up	<u>In & Around</u>	Perimeter & Area with Conversions	64
Ramp Up	<u>Measurement Matters</u>	Perimeter & Area with Conversions	71
Ramp Up	<u>Another Dimension</u>	Area & Perimeter	82
Ramp Up	<u>Start to Finish</u>	Elapsed Time	87
Ramp Up	<u>Minutes of Time</u>	Elapsed Time	97
Ramp Up	<u>Time, Time, Time</u>	Elapsed Time	106
Launch	<u>Curly Spurley</u>	Time, Length, Perimeter, & Area	109

Content and Instruction Extras

MEANING BEHIND THE MATH

<u>A Sample Conversation about Conversions (4.IG)</u>	7
<u>The Importance of Drawing Pictures in Measurement Problems (4.IB, 4.IC)</u>	27
<u>Helping Students Separate Perimeter and Area (4.IF)</u>	50
<u>Using a Strip Diagram to Solve Elapsed Time Problems (4.IC)</u>	88
<u>Allowing Students to be Flexible in between the Start Time and the Finish Time (4.IB, 4.IC)</u>	106

READING, WRITING, AND SPEAKING TO IMPROVE CRITICAL THINKING

<u>Talking About Time (4.IG)</u>	97
--	----

WORKING THE CLASSROOM

<u>Using Highlighters with Conversions (4.IC)</u>	16
<u>Correcting Student Misconceptions in Conversions: When to Multiply vs. When to Divide (4.IB)</u>	22
<u>Combining Strip Diagrams, Equations, and Length Problems while Building Fluency (4.IF)</u>	32
<u>Stopping Mistakes Before They Happen—Conversions in Length Problems (4.IB)</u>	41
<u>Guiding Students Through Problems That Involve Both Perimeter and Area (4.IB)</u>	55
<u>This is HARD! Small Group Instruction vs. Whole Class Discussion (4.IG)</u>	64
<u>Posting the Answers?</u>	109

TABLE OF STANDARDS (PG. 1 OF 2)

The activities in this 4th grade Measurement book address the following standards.

Where are we going? Focus Standards		Activity
(4.5)	Algebraic reasoning. The student applies mathematical process standards to develop concepts of expressions and equations. The student is expected to:	
4.5D	solve problems related to perimeter and area of rectangles where dimensions are whole numbers. Readiness Standard	7 , 8 , 9 , 10 , 11 , 15
(4.8)	Geometry and measurement. The student applies mathematical process standards to select appropriate customary and metric units, strategies, and tools to solve problems involving measurement. The student is expected to:	
4.8B	convert measurements within the same measurement system, customary or metric, from a smaller unit into a larger unit or a larger unit into a smaller unit when given other equivalent measures represented in a table; Supporting Standard	1 , 2 , 3 , 10 , 12 , 13 , 14
4.8C	solve problems that deal with measurements of length, intervals of time, liquid volumes, mass, and money using addition, subtraction, multiplication, or division as appropriate. Readiness Standard	4 , 5 , 6 , 10 , 11 , 12 , 13 , 14 , 15

What kind of mathematical thinking will we use? Working Standards		Activity
(4.4)	Number and operations. The student applies mathematical process standards to develop and use strategies and methods for whole number computations and decimal sums and differences in order to solve problems with efficiency and accuracy. The student is expected to:	
4.4A	add and subtract whole numbers and decimals to the hundredths place using the standard algorithm; Readiness Standard	4 , 5 , 6 , 15
4.4B	determine products of a number and 10 or 100 using properties of operations and place value understandings; Supporting Standard	1 , 2 , 3 , 4 , 8 , 11
4.4D	use strategies and algorithms, including the standard algorithm, to multiply up to a four-digit number by a one-digit number and to multiply a two-digit number by a two-digit number. Strategies may include mental math, partial products, and the commutative, associative, and distributive properties; Supporting Standard	1 , 2 , 3 , 4 , 5 , 6 , 8 , 9
4.4F	use strategies and algorithms, including the standard algorithm, to divide up to a four-digit dividend by a one-digit divisor; Supporting Standard	1 , 2 , 3 , 4 , 6 , 8
4.4H	solve with fluency one- and two-step problems involving multiplication and division, including interpreting remainders. Readiness Standard	7 , 8 , 9 , 10 , 11 , 15
(4.5)	Algebraic reasoning. The student applies mathematical process standards to develop concepts of expressions and equations. The student is expected to:	
4.5A	represent multi-step problems involving the four operations with whole numbers using strip diagrams and equations with a letter standing for the unknown quantity; Readiness Standard	2 , 4 , 12 , 13 , 14
4.5B	represent problems using an input-output table and numerical expressions to generate a number pattern that follows a given rule representing the relationship of the values in the resulting sequence and their position in the sequence; Readiness Standard	10

TABLE OF STANDARDS (PG. 2 OF 2)

The activities in this 4th grade Measurement book address the following standards.

What kind of mathematical thinking will we use? Process Standards		Activity
(4.1)	Mathematical process standards. The student uses mathematical processes to acquire and demonstrate mathematical understanding. The student is expected to:	
4.1A	apply mathematics to problems arising in everyday life, society, and the workplace;	1 , 2 , 3 , 4 , 5 , 6 , 7 , 8 , 9 , 10 , 11 , 12 , 13 , 14 , 15
4.1B	use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution;	1 , 2 , 3 , 4 , 5 , 6 , 7 , 8 , 9 , 10 , 11 , 12 , 13 , 14 , 15
4.1C	select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems;	1 , 2 , 3 , 4 , 5 , 6 , 7 , 8 , 9 , 10 , 11 , 12 , 13 , 14
4.1D	communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate;	7 , 14 , 15
4.1E	create and use representations to organize, record, and communicate mathematical ideas;	1 , 2 , 3 , 5 , 6 , 8
4.1F	analyze mathematical relationships to connect and communicate mathematical ideas.	1 , 2 , 3 , 4 , 5 , 6 , 7 , 8 , 9 , 10 , 11 , 12 , 13 , 14 , 15
4.1G	display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.	8
